THE REEDE SCHOLARS

The **Reede Scholars** are a group of health care professionals including physicians, psychiatrists, psychologists and dentists who have completed a health policy fellowship program at Harvard University funded by the Commonwealth Fund, California Endowment, and the Joseph L. Henry Oral Health Program. Scholars hold positions in key areas of health care services throughout the nation.

The objective of the Reede Scholars Annual Health Equity Symposium is to host a multidisciplinary forum to enlist diverse perspectives for creating strategies that promote health equity. Communicating health policy to communities that are frequently without a voice and often misinformed is a challenge. This year our theme, **The Affordable Health Care Act: Who's In and Who's Out?** serves to explore how we improve communication and implementation in regards to affordable care health advocates and the communities they serve. Join us as experts from different arenas in health care offer examples and strategies that will strengthen the voice of health advocates so that underserved communities can take full advantage of policy provisions and even raise their voice to inform the direction of future policy-making.

REEDE SCHOLARS, INC.

History and Mission

The Reede Scholars Health Equity Symposium was established to honor Joan Y. Reede, a mentor, inspirational leader, and tireless advocate for vulnerable populations.

The Reede Scholars, Inc. is the alumni organization of the Commonwealth Fund/Harvard University Fellowship in Minority Health Policy, California Endowment Scholars in Health Policy, and Joseph L. Henry Oral Health Fellowship programs at Harvard Medical School.

MISSION

The mission of the organization is to transform health policy through education, research, policy and practice to improve human health and well being.

GOALS

Our growing network of scholars seeks to achieve the following goals:

- Ensure high quality health care and public health services for all populations.
- Enhance measurement and surveillance of targeted public health and health care goals in disadvantaged/vulnerable populations.
- Develop, implement, and evaluate health policies that address social determinants of health and leading causes of morbidity and death.
- Engage communities we serve through dialogue, education, and civic participation to advocate for improved health, community empowerment, and health equity.
- Support endeavors to educate future Reede Scholars.
